Tirawat Saijai (Beam)

Front End, Fullstack Web Developer

Birthdate: 22/11/1995   **Phone:** 0802399635   **Email:** tirawat.saijai@gmail.com   **Line:** 0802399635   **Github:** github.com/fivefrogsix

I have been working as a Web Developer for about 3 years, including over a year of freelancing during my spare time. Currently, I work at an insurance brokerage as a Fullstack Developer, but I primarily focus on Frontend. I also handle some Backend tasks using PHP and Golang (Gin framework). On the Frontend, I mostly work with Vue3 and Vite, although there are some older projects using PHP and JavaScript. While I prefer working on Frontend, I am capable of doing both, with greater proficiency in Frontend. During my freelancing work, I exclusively used Vue.js and Nuxt.js. Currently, I am planning to explore developing for LINE OA with a former team member in my free time.

Highlight

- Responsive
- Version Control/Git
- Componnet Style
- Problem Solving
- Experience with web views (True Money)
- Dark theme
- Chat-gpt or other ai chat
- Node package
- CSR/SSR
- Experience in insurance industry
- Multilanguage
- Read document
- Like good practice
- Pagination/Infinity Scroll SSR
- Experience developing e-commerce

Developer Skill

Frontend: HTML **4 years** Css **4 years** Sass & Scss **3 years** Css framework or lib **3 years** Javascript **4 years** Javascript Library **3 years** Vuejs **2 years** Nuxtjs **1 year**

Backend: PHP **3 years** Laravel **1 year** Codeigniter 3 **1 year** Golang (GIN) **1 year** MySQL **4 years**

Other: Typescript **Learning** Nodejs **Learning** Unit test **Learning**

* JavaScript libraries, CSS frameworks, or popular libraries such as Bootstrap, jQuery, Select2, axios, etc.

Experience

Fullstack Developer, GO (THAILAND) COMPANY LIMITED

Responsible for full-stack development of prakun.com under GO (Thailand) and ANC Insurtech. Worked on various insurance products, including cancer, life, travel, accident, auto, and migrant worker insurance. Focused on front-end tasks and API integration (PHP, Golang), excluding policy transmission to insurers. Also collaborated on Truemoney Wallet (Webview) integration for insurance sales.
Tools: HTML, CSS, Sass, PHP, Javascript, jQuery, Bootstrap, Vue, Golang (GIN), GIT

Fullstack Developer, Freelance

Managed and developed the e-commerce website (Encore Fashion), responsible for the backend system (except APIs), frontend development (Nuxt.js), API adjustments (Gin Golang), database design, server setup (Lightsail Ubuntu), SSL installation, and reverse proxy configuration (Nginx). Additionally, developed job application and task reporting websites (Vue 3, Vite), handling only the frontend and database design. Also set up and maintained the backend server for UPL (Thailand), installed Cloudflare and SSL, and assisted with server setup for a research project at Mahidol University, based on client requirements.
Tools: HTML, CSS, Sass, PHP, Lumen, Javascript, Vue, Bootstrap, Nuxt, Ubuntu, Golang (GIN), GIT

**Programmer, Big-Ben (Paints) Company Limited**

Developed company websites for both frontend and backend (CRUD, e-commerce), integrating the backend with the company's local server. Designed databases and partially contributed to UX/UI design. Additionally, created a mockup website for a startup, set up the email system on Linux, and handled various support tasks, such as assisting users with device or network issues. Monitored CCTV systems (including a small project to display camera feeds on the web), installed facial recognition systems, and trained staff on how to use the system.
Tools: HTML, CSS, PHP, jQuery, Bootstrap, Codeigniter 3, Ubuntu,

Education

Bachelor's Degree, Information Technology, Thonburi University

Higher Vocational Certificate, Business Computer, Mubankru Technology College

Website Resume Tools: Vue3, Vite, typescript, Sass, Pinia
