Tirawat Saijai

Beam

Front-End Developer

Personal Profile

I currently work as a Fullstack developer, but I mainly focus on Frontend development. I also do some Backend work. I prefer Frontend development over Backend, but I am capable of handling both, with greater proficiency in Frontend. I am available to work 100% in the office or in a hybrid model, depending on the company's conditions. I am eager to learn new things.

Work Experience

☑ **GO (THAILAND) COMPANY LIMITED**   **Mar 2022 - Current**
GO (THAILAND) mainly operates under ANC Insurtech. My responsibilities include completing assigned tasks on time, primarily focusing on front-end development with some back-end tasks depending on the project. I also collaborate with partners, including TrueMoney Wallet. The main development tools I use are HTML, CSS, JavaScript, and PHP.

☑ **Freelance**   **Jan 2023 - Dec 2023**
After leaving my job, I completed 4 freelance projects with friends, including developing an E-Commerce website, handling front-end HTML slicing, managing backend systems for 2 projects. I used Vue.js, Golang, PHP, and Nuxt.js extensively, and also set up servers for 2 projects using Ubuntu.

☑ **Big-Ben (Paints) Company Limited**   **Oct 2020 - Dec 2021**
Worked on assigned tasks such as developing company websites for both frontend and backend, creating a Mockup Startup website, setting up company email systems (Linux), and providing IT support services.

Education

☑ **Thonburi University**
Bachelor's Degree in Information Technology

☑ **Mubankru Technology College**
Higher Vocational Certificate in Business Computer
